# Integrated Management Policy

Thales Brazil, in its provision of services, development and manufacture of electronic and telecommunications equipment in the segments: aerospace, naval, defense, scientific, atmospheric, environmental, seeks the sustainability of its businesses, acting in the responsible management of environmental aspects inherent in the nature and scale of its activities.

## COMMITMENTS:

- Provide quality products and services, focusing on customer satisfaction;
- Establish opportunities for the development of its employees;
- Research new technologies to follow market trends and customer needs;
- Protect the environment and mitigate the risks and environmental impacts of its operations through pollution prevention actions and employee awareness, from production to distribution of its products and services;
- Comply with the legislation applicable to its activities, products, services, and establish controls that guarantee that inputs of illegal origin are not used in its activities;
- Provide a healthy work environment that guarantees the safety, health and well-being of its employees in order to prevent possible injuries by eliminating and reducing hazards and risks;
- Continuously improve the integrated Management System consistently, optimizing the organization's performance;
- Ensure that the guidelines established in the group's software management policy are duly implemented and fully followed;
- Ensure that the guidelines established by the AEO - Authorized Economic Operator program are duly implemented and fully followed.

## THALES BRAZIL ESTABLISHES THE FOLLOWING OBJECTIVES ALIGNED WITH ITS INTEGRATED MANAGEMENT POLICY:

- Ensure customer satisfaction;
- Ensure that your employees are properly trained and developed;
- Develop innovative products and services, based mainly on the needs of its customers;
- Ensure that significant environmental impacts are: properly measured, monitored and controlled;
